

INFORMATION AND LINKS FOR PREWOUND BOBBINS

Try this website for your bobbins if you are in the UK:

https://www.embroideredjust4u.co.uk/ourshop/cat_923230-BOBBIN-THREADS-AND-PREWOUND-BOBBINS.html

Try this website if you are in the US:

<https://www.ABC-Machine-Embroidery.com>

For elsewhere put "prewound bobbins" into your search engine followed with the abbreviation for your country. Eg. Prewound bobbins Aus for Australia. If all else fails check on Ebay or Amazon in your country.

If you are not sure which size to get for your machine, first check your machine manual. If it's still not clear check the website that corresponds to your machine. For example if you have a Brother machine check the Brother website. If you are still unsure this chart might help:

Unless stated otherwise, the vast majority of embroidery machines seem to work best with plastic sided prewound bobbins. Just check the size you need, and start using prewounds. They can save you a lot of time and trouble.

To be 100% sure whether your machine takes L or A style bobbins, it may be a good idea to call your dealer. Or, take a ruler, and measure your "native" bobbin VERY CAREFULLY:

A size diameter should be 0.8 inches (20 millimeters), height should be 0.4 inches (10 millimeters).

L size diameter should be 0.8 inches (20 millimeters), height should be 0.3 inches (7.5 millimeters)
